### QUESTIONS

#### LEVEL 2 — MEDIUM

**Q1**

Array

**Q2**

Numbers

**Q3**

Control

**Q4**

Strings

4 / 4 saved

**Level 2 — Medium (M) Student** — Control**✓ Submitted**

Write a program to enter the marks of a student in four subjects. Then calculate the total and aggregate, display the grade obtained by the student.

If the student scores an aggregate greater than 75%, then the grade is Distinction.

If aggregate is  $60 \geq$  and  $< 75$ , then the grade is First Division.

If aggregate is  $50 \geq$  and  $< 60$ , then the grade is Second Division.

If aggregate is  $40 \geq$  and  $< 50$ , then the grade is Third Division.

Else the grade is Fail.

Sample Input & Output:

Enter the marks in python: 90

Enter the marks in c programming: 91

Enter the marks in Mathematics: 92

Enter the marks in Physics: 93

Total= 366

Aggregate = 91.5

DISTINCTION

Testcases:

a) 18, 76, 93, 65

b) 73, 78, 79, 75

c) 98, 106, 120, 95

d) 96, 73, -85, 95

e) 78, 59.8, 76, 79

## Your Code

```
1 import java.util.Scanner;
2 class Main
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc=new Scanner(System.in);
7         int a,b,c,d,total;
8         double agg;
9         a=sc.nextInt();
10        b=sc.nextInt();
11        c=sc.nextInt();
12        d=sc.nextInt();
13        total=a+b+c+d;
14        agg =total/4.0;
15        System.out.println("Total : "+total);
16        System.out.println("Aggregate : "+agg);
17        if(agg>75)
18        {
19            System.out.println("The grade is First division");
20        }
21        else if (agg>=60&&agg<75)
22        {
23            System.out.println("The grade is Second division");
24        }
25        else if (agg>=50&&agg<60)
26        {
27            System.out.println("The grade is Third division");
28        }
29    }
30 }
```

## Output

```
Total : 179
Aggregate : 44.75
The grade is Thrid division
```

```
29     else if (agg>=40&&agg<50)
30     {
31         System.out.println("The grade is B")
32     }
33     else
34     {
35         System.out.println("The grade is C")
36     }
37 }
38 }
```
